DRESDNER
ROBIN

SERVICES PROFILE

CIVIL ENGINEERING

DRESDNER ROBIN'S Civil Engineering Team specializes in creating practical transformative solutions which add value and mitigate risk for our clients. Accustomed to working as part of multi-disciplined teams, we take a wholistic design approach, identifying strategies which integrate aspects of site or facility design within the context of environmental constraints and regulatory requirements. Our clients span the public and private sectors including municipal, county and state agencies, educational institutions, architects, and real estate developers. We help our clients transform liabilities into assets through sound engineering practice while navigating complex regulatory constraints.

We help our clients make their projects more resilient through the inclusion of a variety of measures including green stormwater infrastructure, energy efficient lighting, and others. Dresdner Robin's engineers help our clients achieve their project goals by carefully designing cost effective, practical and resilient sites and facilities and through effectively navigating the unique regulatory constraints at each location. As a pioneer in brownfields redevelopment, our engineers continue to focus on strategies to reduce impacts and improve the built environment while meeting our clients' goals and objectives.

PROFESSIONAL LICENSES AND CERTIFICATIONS

- Professional Engineer Registrations: NJ, NY, PA
- US Green Building Council: LEED Accredited Professionals
- Certified Municipal Engineers – NJ

SPECIALIZED SERVICES

- Site Feasibility / Due Diligence
- Brownfield Redevelopment
- Site Planning
- Water, Sanitary, and Drainage Design
- Stormwater Management
- Green Infrastructure Systems
- Resiliency & Flood Mitigation
- Waterfront Development Design & Coastal Permitting
- Construction Administration
- Construction Cost Estimating
- Geospatial Analysis
- GIS Mapping & Analysis
