DRESDNER
ROBIN

SERVICES PROFILE

LANDSCAPE ARCHITECTURE

DRESDNER ROBIN Landscape Architecture has a 20-year history of impactful design and meaningful placemaking. With extensive experience in urban redevelopment design our team excels in creating pedestrian-friendly streetscapes, mixed-use public plazas and highly programmed rooftop amenities spaces. Our fully integrated approach involves constant coordination with our in-house civil engineering, environmental and planning services, as well as architectural and engineering partners, to produce projects that meet requirements while efficiently satisfying design goals.

Our team has a strong record of working with townships and organizations to create the greenspaces that serve and improve communities. Through stakeholder interviews, community engagement practices, and public meeting design charrettes, we have engaged in collaborations that have produced designs for new parks and greenways, sports fields and event venues, resilient green infrastructure and environmental restoration.

Whether a simple park rehabilitation or a multi-block-scale redevelopment project, our team takes a thoughtful and purposeful approach to deliver designs that succeed for our clients.
